Excellent Mental Health-Building Strategies By Stacey Curnow I was asked to be an early reviewer for *13 Things Mentally Strong People Don't Do*, and to focus on which of the 13 Things I found most helpful or applicable to my own life. Amy says she's the only person in the psychology industry who is talking about mental strength on a global level, and I'm delighted that she's bringing the weight of science to this topic (likening mental strength to something you can improve with practice and discipline just like physical health). She encourages readers to adopt certain mental strength-building strategies by first looking at what mentally strong people don't do. Here's the full list: 1. They Don't Waste Time Feeling Sorry for Themselves 2. They Don't Give Away Their Power 3. They Don't Shy Away from Change 4. They Don't Waste Energy on Things They Can't Control 5. They Don't Worry About Pleasing Everyone 6. They Don't Fear Taking Calculated Risks 7. They Don't Dwell on the Past 8. They Don't Make the Same Mistakes Over and Over 9. They Don't Resent Other People's Success 10. They Don't Give Up After the First Failure 11. They Don't Fear Alone Time 12. They Don't Feel the World Owes Them Anything 13. They Don't Expect Immediate Results I thought each of one of the above is important, but given my assignment I'm going to focus on thing they don't do #6: They Don't Fear Taking Calculated Risks. Amy says that all too often people stop themselves from taking a risk because it evokes a strong fear response. The problem is we don't even investigate the thoughts and beliefs that triggered the fear response in the first place. We simply decide not to think about it or its consequences at all. And without understanding the beliefs that created the fear, or the potential outcomes of taking a risk even when we do, we end up completely avoiding risky ideas or dreams altogether. The bottom line is, most of us don't really invest much time calculating which risks to take and which risks to avoid. Instead, we base our decisions on emotion or habit. If it feels too scary, we avoid the risk. But here's where it gets interesting: Amy tells us if we're excited about the possible benefits, we're more likely to work through the challenges that the risk presents. So we really need to be willing to work with our fears in order to transform them. What I know for sure is that everything we want is outside of our comfort zone. To quote Amy Morin from *13 Things*, "If we only take risks that make us the most comfortable, we're likely missing out on some great opportunities. Taking calculated risks often mean the difference between living a mediocre life and living an extraordinary life." I found Amy's book helpful in so many ways, and I highly encourage you to read *13 Things*: she provides many, many helpful checklists, tools, tips and strategies for becoming mentally strong and living the life of your dreams. In the chapter about taking calculated risks, she even provides a comprehensive list of questions to ask yourself to help create your own risk/benefit analysis. If you have ever felt stuck or small in the past and want a new way of evaluating clear next steps for building your mental strength, you'll love this book! 181 of 194 people found the following review helpful. "People who avoid failure also avoid success." -- Robert Kiyosaki. By Bassacantor This book grew out of a series of tragic events in the author's life. Three years after her mother died, Amy's husband, still young, suddenly died of a heart attack. Now she not only had lost her mother, she had lost her husband as well. After these tragic events, the author decided to write down what she had personally learned: 13 things mentally strong people don't do. "They were the habits I'd fought so hard against to come out on the other side of my grief." These thirteen habits don't just help you get through grief, they will help you develop mental strength. Here are some parts of 13 THINGS I thought were especially good: **Developing mental strength** requires three different steps: First thoughts, second behavior, third emotions. We have to balance our emotions with rational thinking: "We make our best decisions in life when we balance our emotions with rational thinking." One of the first chapters shows the problems with self-pity: "Feeling sorry for yourself is itself destructive. It leads to new problems and can have serious consequences." Instead of wallowing in pity, Amy suggests exchanging self pity for gratitude. The author cites a 2003 study in the "Journal of Personality and Social Psychology," which shows that people who feel gratitude don't get sick as often as others. A big mistake is a sense of entitlement: "Get over yourself. Develop self awareness of your sense of entitlement." A big obstacle to mental strength is giving other people power over you: "Giving other people the power to control how you think, feel, and behave makes it impossible to be mentally strong." This book is filled with lots of practical suggestions. Here's one simple one: "When you receive criticism or feedback from others, wait a beat before responding. If you're upset or emotionally reactive, take the time to calm down." Learn from prior mistakes: "Establish behavior that will replace previous behavior. Instead of drinking alcohol to cope with stress, a person could identify alternative strategies, such as going for a walk or calling a friend." Looking at prior mistakes in a positive way helps you to learn so that you don't repeat them again. Finally, in order to maintain mental strength, try coaching yourself. Follow these steps: First monitor your behavior, secondly regulate your emotions, thirdly think about your thoughts. **Wow!** All in all, *13 THINGS* is a practical, well-written book by someone who knows what she is talking about--both professionally as well as personally. I learned a lot of good, practical ideas. At the conclusion of the book the author provides references to support her various conclusions. A Review by Chris Lawson Note: I do not know the author of this book, and no one requested I write this review. 102 of 110 people found the following review helpful. The Highest of Praise for a Book on This Subject Matter By DJDA After appreciating the author's article with the same time that appeared in Forbes magazine, I was looking forward to her book with high expectations. They were met. As good as

that article is, this book takes it to a much deeper level with fuller examples and explanations, but maintains the reader's interests throughout. I consider this book exceptional. The analogy that I will use is that it is the opposite of most movies that are based on books. In movies, things are often removed to fit time. In this case, the Forbes article is expounded upon to include explanations and examples of real-life situations that can be applied whether the reader is looking for ways to improve their personal life, their professional life, their financial situation, ways to take care of their health, relationships- I, suppose, just about any part of life. There is very little jargon, no fluff, and I felt that Ms. Morin truly cares about the reader, rather than caring more for self-promotion of her expertise. She is expert. She is just as human as the reader. Both the situations and the recommendations are "real." I was left with no thought whatsoever that the recommendations are "good theories that might work in an ideal setting, but not in real life." I have read or listened to over 100 books that deal with personal improvement of some kind. Most are specific to one or two aspects of life. I would rank "13 Things..." with the very best of them for what I look for in a book.
