Donald Marron : 30-Second Economics: The 50 Most Thought-Provoking Economic Theories, Each Explained in Half a Minute before purchasing it in order to gauge whether or not it would be worth my time, and all praised 30-Second Economics: The 50 Most Thought-Provoking Economic Theories, Each Explained in Half a Minute:

2 of 2 people found the following review helpful. Highly Entertaining and Informative! By R. Watts If you're interested in economics (and every responsible adult should be,) this is a very useful book on the theories behind the subject. Constructed in a highly entertaining, informative and easy to follow reference guide, this beautifully bound book highlights "the 50 most thought-provoking economic theories" such as Marginalism, the Expected Utility Theory, Free Market Capitalism and The Phillips Curve. Colorful illustrations and charts add much character to this book and all in all, it's a quick and enjoyable read. One of the best in the 30 Second Book Series. 1 of 1 people found the following review helpful. A Good Economics Dictionary By PDA An easy to understand read with good explanations of

economic terms, theories, etc. Not for the well informed. Explanations, due to conciseness constraints, are broad, general and don't include everything. But for the layman to get what the pundits are talking about, I would highly recommend it. 0 of 0 people found the following review helpful. This is better than I hoped! By ErikIt's even a little more in depth than I thought it would be. It touches on many people I probably wouldn't have ever gotten around to reading like Ricardo, Becker, Malthus. Unfortunately there's more Keynes in here than any fan of the free market would want to hear. Great resource of basic info in dozens of areas!

Keynesian Economics, Free Market Capitalism, Monetarism, Game Theory and the Invisible Hand. Sure, you know what they mean. That is, you've certainly heard of them. But do you know enough about these economic theories to join a dinner party debate or dazzle the bar with your financial knowledge? 30 Second Economics takes the top 50 economic theories, and explains them to the general reader in half a minute, using nothing more than two pages, 300 words and one picture. Economics will suddenly seem a lot more fun than the economy, and make a lot more sense, and along the way you'll meet founding fathers of modern economics such as Adam Smith, David Ricardo and Alfred Marshall. From Marxism to Mercantilism, plus everything in between, this is the ultimate 'crash' course in economic theory.

About the Author Editor Donald Marron is visiting professor at the Georgetown Public Policy Institute in Washington DC, where he teaches public finance and macroeconomics. He has had a diverse career as a professor, consultant and entrepreneur and from 2002 to 2009 served in various senior positions advising Congress and the White House.
