This book should be part of every pre-service and in-service program for teachers and administrators who serve English learners. The challenge is not what we can do for our students. This book provides educators with a firm understanding of the social and emotional supports that we must provide in order for our ELLs to maximize their academic potential. Advocating for English Learners goes beyond the classroom--linking our students' realities to the school. It shows us how to use our sphere of influence to provide what might be the missing ingredients for helping our ELLs to learn. students and their families -one of the most important books for educators and advocates in education to be written.---

Luis-Gustavo Martinez, Lecturer I of Applied Linguistics (05/01/2013)-It is common knowledge that English language learners (ELLs) are the fastest growing population in our schools. Most teachers are likely to have one or more ELLs in their classrooms, and yet there is still so much misunderstanding and confusion about what a quality equitable education represents for ELL students. Staehr Fenner's work sheds light on what is different about ELL students. She highlights the importance of Advocacy and Collaboration in order to develop and implement a well-rounded education program for ELLs. And she does so with a refreshing perspective, using clear, real-life examples and providing guidance about how to implement those promising practices and tackle challenges along the way. Staehr Fenner's work will no doubt dispel the myths and encourage positive changes for ELLs in our schools.---

David G. Nieto, Division Administrator (04/25/2013)-It's evident from the first pages that Diane Staehr Fenner knows what it's like to be in a classroom, hallway, or meeting where English language learners and their needs are being overlooked or marginalized. In this essential new book, she gives teachers the framework and the tools we need to advocate effectively and ensure our students the seat at the table they so deserve. I would recommend this book to anyone who educates ELLs, and since today that is nearly everyone in education, it could not be more timely. These beautiful, multi-talented children are the future. Thank you, Diane, for helping to make our voices stronger on their behalf.---

Barbara Page, ESL Teacher (05/01/2013)-Wow! This is the first book I have encountered which is devoted solely to the area of advocacy for English language learners (ELLs). In education, where the effects of political and judicial decisions are apparent, this is a very much needed book in guiding future educators and inservice teachers to be strong catalysts in advocating effectively for the academic success of ELLs.---

Arlene Costello, 2007 Christa McAuliffe Educator/ Teacher on Special Assignment (04/24/2013)-In this timely and utterly necessary book, Staehr Fenner explains why all educators need to advocate for English language learners, based in solid yet accessible research, and how to do so with the supporting resources and activities provided. She guides readers in understanding and implementing -scaffolded advocacy,- including effective instruction for ELLs. Margins notes included throughout will allow teacher educators to easily use this as a training manual for pre-service and in-service teachers working with ELLs. Finally, the personal anecdotes, stories, and vignettes from the field leave the reader with the crucial message of the book: everyone can and should be an advocate.---

Heather A. Linville, TESOL Instructor/ELL Advocate (05/01/2013)-With *Advocating for English Learners: A Guide for Educators*, Diane Staehr Fenner closes a gap in teacher education publications. This much-needed book addresses immigrant realities, teacher experiences, administrator preparation, and Title III policies by using advocacy as the organizing principle. Based on solid professional foundations and with great insight and skill, Dr. Staehr Fenner provides all stakeholders with tools for a collaboration that works so that linguistically and culturally diverse student population needs can be sufficiently addressed in K-12 contexts and beyond.---

Christel Broady, Director (06/11/2013)-This book provides a much-needed resource for teachers of English language learners (ELLs). Dr. Staehr Fenner shows the importance of advocating for ELLs and preparing teachers to do this work. There is no other book that provides such an emphasis. The personal anecdotes and examples will help teachers connect with issues of advocacy in teacher education programs. This book shows that teachers and administrators can be change agents through their advocacy work for ELLs.---
