Excellent source for discussions 0 of 0 people found the following review helpful. Five Stars By Customer Good 0 of 0 people found the following review helpful. Five Stars By Bazyli Smolinski Must have within your finance knowledge base.

An Introduction to Global Financial Markets describes the financial world in clear, easy to understand terms. The authors provide comprehensive coverage of commercial and investment banking, foreign exchange, money and bond markets, stock markets and derivatives and an up to date analysis of the global financial crisis. Key benefits:

- A new chapter on the global financial crisis and banking regulation
- Updated coverage of investment banking, hedge funds and private equity
- Details of controversial new market instruments: credit default swaps and collateralised mortgage obligations
- Expanded coverage of emerging markets, including Brazil, Russia, India and China
- New companion website featuring PPT slides, interactive revision questions, case studies and exercises, bonus chapters and analytical content

An Introduction to Global Financial Markets is recommended for students studying finance and financial institutions, practitioners, and those who require an understanding of the global financial system.

“For the next 20 years, the most important feature of any financial market text will be its treatment of the worldwide financial crisis of 2007-2009. And in my view, the very best feature of Valdez and Molyneux is that readers can get to this material quickly—after just a handful of requisite chapters on the basics of markets and institutions—so that important financial market issues can be discussed in full light of this historic and nearly catastrophic financial episode. The details, the causes, and the near-term consequences of the crisis are all here, and they are presented, as is all of the material in this book, in friendly and highly readable fashion. I especially recommend this book to readers who want (need) a non-US-centric perspective on global financial markets and the fallout from a US-bred crisis.”

—Robert DeYoung, Capitol Federal Chair in Financial Markets and Institutions, The University of Kansas
