L. Zanforlin, Ian Tower, Erlend Nier : The Perimeter of Financial Regulation before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Perimeter of Financial Regulation:

The G-20 has called for a review of the scope of financial regulation. This reflects the concern that prevailing policy considerations were flawed in all important respects. Considerations are given to widen the perimeter for regulation and to take necessary steps for strengthening the regulation of institutions already within the perimeter. Extensions to the regulation of products and markets should be considered within a similar framework. Finally, the regulation should be supplemented by close monitoring of the potential arbitrage opportunities it creates.
