Jae-Yong Chung, Richard J. Kirkby : The Political Economy of Development and Environment in Korea: Volume 52 (Routledge Studies in the Growth Economies of Asia) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Political Economy of Development and Environment in Korea: Volume 52 (Routledge Studies in the Growth Economies of Asia):

This book looks at Korea's economic, social and spatial development processes from the early Modernisation period to the financial crisis of 1997. It focuses on the political and ideological control of the state during the developmental era, as well as the environmental problems of Korea, and examines how society and environment have been used as means to attain rapid accumulation. Providing an holistic approach to Korean development, this title allows a comprehensive view of Korea's economic miracle as well as its recent problems.

'An indispensable resource to scholars in Korean studies.' - Korea Journal
