From SAGE Publications Ltd : The SAGE Handbook of Housing Studies before purchasing it in order to gauge whether or not it would be worth my time, and all praised The SAGE Handbook of Housing Studies:

Cross-disciplinary and critical in its approach, The SAGE Handbook of Housing Studies is an elucidating look at the key issues within the field. It covers the study of housing retrospectively, but also analyses the future directions of research and theory, demonstrating how it can contribute to wider debates in the social sciences. A comprehensive introductory chapter is followed by four parts offering complete coverage of the area: Markets: examines the perception of housing markets, how they function in different contexts, and the importance of housing behaviour and

neighbourhoods Approaches: looks at how other disciplines - economics, geography, and sociology - have informed the direction of housing studies Context: traces the interactions between housing studies and other aspects of society, providing context to debate housing through issues of space, social, welfare and the environment. Policy: is a multi-disciplinary and comprehensive take on the major policy issues and the causes and possible solutions of housing problems such as regeneration and homelessness. Edited by leading names in the field and including international contributions, the book is a stimulating, wide-ranging read that will be an invaluable resource for academics and researchers in geography, urban studies, sociology, social policy, economics and politics.

The SAGE Handbook of Housing Studies is the comprehensive volume we have long been waiting for. Chapters by leading scholars from many disciplines offer students, housing professionals and policy analysts an insightful examination of the complex aspects of the housing sector" Andrejs Skaburskis ""Professor and North American Editor of Housing Studies, Queen's University, Canada" So, what is a 'handbook of housing studies' actually for? Who will benefit from this book? Housing scholars will want to take a look at chapters in their research areas, but I suggest going beyond this and taking the opportunity to widen horizons. Scholars from other disciplines will benefit enormously from many chapters. And, of course, the handbook is a very valuable resource for students, with many chapters forming a good starting point for further study. Jenny Muir Environment and Planning C: Government and Policy The weighty (and expensive) book is unique in bringing together essays from a range of countries, on multiple issues, and from diverse and explicit economic and social perspectives. I have found myself recommending this book to colleagues from economics, public policy and urban planning as a broad yet focused introduction to the state of the art in housing studies research. The SAGE handbook of housing studies is a hugely important contribution to the field of housing studies, and should be in the library of every university, and on the shelves-- or desks--of housing scholars everywhere.--Emily Silverman (01/10/2014) The comprehensive volume we have long been waiting for. Chapters by leading scholars from many disciplines offer students, housing professionals and policy analysts an insightful examination of the complex aspects of the housing sector.--Andrejs Skaburskis (02/26/2014) So, what is a 'handbook of housing studies' actually for? Who will benefit from this book? Housing scholars will want to take a look at chapters in their research areas, but I suggest going beyond this and taking the opportunity to widen horizons. Scholars from other disciplines will benefit enormously from many chapters. And, of course, the handbook is a very valuable resource for students, with many chapters forming a good starting point for further study.--Jenny Muir (02/26/2014)...an admirable consolidation of current knowledge and provides an excellent overview of contemporary housing issues.--Richard Ronald I challenge anyone to dip into this text without taking something new and important away. It is a 'state-of-the-art' collection, which offers an interdisciplinary even transdisciplinary perspective on the most important themes in the field; it is a fine, thought-provoking read.--Susan J. Smith, Department of Geography and Girton College, Cambridge University [U]nique in bringing together essays from a range of countries, on multiple issues, and from diverse and explicit economic and social perspectives. I have found myself recommending this book to colleagues from economics, public policy and urban planning as a broad yet focused introduction to the state of the art in housing studies research. It is a 'state-of-the-art's' collection, which offers an interdisciplinary even transdisciplinary perspective on the most important themes in the field; it is a fine, thought-provoking read. (Susan J. Smith, Department of Geography and Girton College, Cambridge University) About the Author William Clark is the Harvey Brooks Professor of International Science, Public Policy and Human Development at Harvard University's John F. Kennedy School of Government. Trained as an ecologist, his research focuses on the interactions of environment, development and health concerns in international affairs. At Harvard, he currently co-directs the Sustainability Science Program. He is co-author of Adaptive environmental

assessment and management (Wiley, 1978), and Redesigning rural development (Hopkins, 1982); editor of the Carbon dioxide review (Oxford, 1982); coeditor of Sustainable development of the biosphere (Cambridge, 1986), The earth transformed by human action (Cambridge, 1990), Learning to manage global environmental risks (MIT, 2001), Global Environmental Assessments (MIT, 2006) and The global health system: Institutions in a time of transition (Harvard, 2010); and co-chair of the US National Research Council's study Our Common Journey: A Transition Toward Sustainability (NAP, 1999). He serves on the editorial board of the Proceedings of the National Academy of Science. Clark is a member of the National Academy of Sciences and a Fellow of the American Association for the Advancement of Science. He is a recipient of the MacArthur Prize, the Humboldt Prize, the Kennedy School's Carballo Award for excellence in teaching, and the Harvard College Phi Beta Kappa Prize for Excellence in Teaching.
