I especially like books on business, finance, self-help, and whatever I can learn from to

better myself. I especially enjoy easy to read books and this is one of them. I read the book in just a few hours compared to books that take days. This is a book for real people with a normal vocabulary and average intelligence, like myself. The author asks the reader to dismiss many of the negative thoughts that we've all been given over the years. The book explains how just a 10% saving commitment from income (regardless of your income) can multiply into some serious savings for the future. The formula on page 48 is startling as to how money compounds, whether you have \$100 a month or \$1000 a month available. Start TODAY!!! Any book that teaches (or reinforces) ideas or lessons is worth its cost. Learn how affirmations can turn your dreams into realities and how only 10% of your income can be used to build a better life for yourself and for others. Don't just put this on your wish list... Buy It Now!!! 5 of 5 people found the following review helpful. Brilliant, concise outline of New Age personal finance By Jonathan Betz-Zall Like many other self-improvement books, the author draws life lessons from his own experience, in this case facing down the financial pressures many middle class Americans feel and finding meaning in the solutions he found to deal with them. In a nutshell, he advocates saving ten percent of one's earnings, donating another ten percent, and becoming socially active. Numerous other authors have prescribed these remedies, most notably Dominguez and Robin in "Your Money or Your Life", but none with such economy of language. This is great inspiration for those just starting to think about getting out of their ruts, particularly for those with the imagination to apply the ideas in their own situation without specific guidance from the author.

This short, powerful work is potentially life changing, for it is filled with simple solutions to the difficult problems that confront us ? individually and globally. Marc Allen offers clear, doable solutions to both our personal financial problems and global problems. Key to many of these solutions is both saving and giving away 10 percent of our income, also known as "tithing." By taking the kinds of actions recommended in this book, we can not only achieve financial security but also contribute substantially to a better world as well. The Ten-Percent Solution shows us how to become part of the solution, rather than part of the problem. The rewards we receive along the way are limitless ? both personally and globally."
