Top Level Success BookBy Henry DeanChristopher Howard has gone from having practically nothing to live on to becoming a sought after seminar speaker worth multi-millions. Having attended a large number of motivational speakers' events before his nadir he pondered how to break out. And he did. He shares his story and the steps he feels anyone who cares to can take to achieve the sort of life they would only dream of - doing what excites their own heart and making a living, and much more than basic living, out of

it. Using a basis of NLP he developed related techniques that can speed you in the direction YOU want to take. One overall read is required to get an idea of the whole process. Then a more deliberate step-by-step approach to put these ideas into action. But with the thorough self-evaluation that is built into the text, with check-lists and spaces to write your results, this seemingly complex process is made more manageable. I have yet to read better book around self-development and achieving your dreams. Get it. 0 of 0 people found the following review helpful.
