From Palgrave Macmillan : Varieties and Alternatives of Catching-up: Asian Development in the Context of the 21st Century (IDE-JETRO Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Varieties and Alternatives of Catching-up: Asian Development in the Context of the 21st Century (IDE-JETRO Series):

This book sheds new light on the advancement of various industries in developing Asian countries through an

application and re-examination of catch-up industrialization theory. With contributors presenting their own perspectives on the progression of a range of different industries in Asia, this volume provokes readers to reconsider their current understanding of industrialization in latecomer countries. More specifically, the chapters discuss Taiwan's semiconductor industry, Korea's steel industry, and Malaysia's palm oil industry, amongst others. The authors also explore the 'catch-down' innovation strategy in China and India. Varieties and Alternatives of Catching-up provides a thorough analysis of the strategies employed by numerous Asian countries to radically transform their low-income agricultural economies to middle-income industrialized ones. This book is essential reading for researchers and scholars interested in Asian economic development.

From the Back Cover This book sheds new light on the advancement of various industries in developing Asian countries through an application and re-examination of catch-up industrialization theory. With contributors presenting their own perspectives on the progression of a range of different industries in Asia, this volume provokes readers to reconsider their current understanding of industrialization in latecomer countries. More specifically, the chapters discuss Taiwan's semiconductor industry, Korea's steel industry, and Malaysia's palm oil industry, amongst others. The authors also explore the 'catch-down' innovation strategy in China and India. Varieties and Alternatives of Catching-up provides a thorough analysis of the strategies employed by numerous Asian countries to radically transform their low-income agricultural economies to middle-income industrialized ones. This book is essential reading for researchers and scholars interested in Asian economic development. About the Author Yukihiro Sato is Director-General of the Interdisciplinary Center at IDE-JETRO, Japan. He also serves as President of the Japan Association for Taiwan Studies. His main research interest is the political economy of Taiwan's industrial development.
