This book is a must read for anyone advising ultra-wealthy familiesBy Adriana TassiniThis book is a must read for anyone advising ultra-wealthy families, personally it was a little scary reading the scenarios and real life stories of how much risk there can be in seemingly mundane activities such as employing house staff, inviting friends onto your yacht, or owning a super car and driving a corporate employee around in it to meetings. The best part of the book for me were the rules of thumb on umbrella insurance, and the gaps which regular insurance just won't cover once you make it to "the next level" as the book says.This book is an eye opener and even though it focuses on insurance it is somehow entertaining as well, if you are helping look out for clients with $20M, $100M, or a $1B or more you will find this book relevant, thoughtful, and well structured. I am currently helping three families formalize and setup a $800M, $100M, and $20B solutions right now and I plan on suggesting they read this book before hiring a risk management or insurance expert.- Richard C.
