Javier Villar Burke : Weathering the Storm: The Financial Crisis and the EU Response, Volume II: The Response to the Crisis before purchasing it in order to gage whether or not it would be worth my time, and all praised Weathering the Storm: The Financial Crisis and the EU Response, Volume II: The Response to the Crisis:

Weathering the Storm explores the factors leading up to the recent global financial and economic crisis, how the crisis unfolded, and the response of European and national authorities. The book describes the rationale behind the measures undertaken to mitigate the consequences of the recession and to ensure that a similar situation does not happen again in the future. In the wake of the crisis, various major changes continue to significantly affect the life and social organization of Europeans. For instance, a new ESM with a size financially comparable to that of the IMF was created; similarly, the reforms in economic governance imply much more intrusive participation of European countries in each other's macroeconomic policies. Moreover, the organization, regulation, and supervision of the financial sector have been drastically revamped. The decisions taken by European and national authorities affect the daily lives of hundreds of millions of European citizens and countless more around the globe. An insightful read for anyone interested in understanding the topic and its effect on their lives, the book primarily addresses undergraduate students in their final year and graduate students in fields such as economics, finance, and political science. The main messages are explained through examples and charts.

About the Author Javier Villar Burke joined the Directorate General for Economic and Financial Affairs (DG ECFIN) of the European Commission in 2008 at the unit dealing with 'Financial institutions and stability mechanisms'. He was involved in the creation and development of the new instruments to support European sovereigns under stress (Balance of Payments Facility, EFSF, EFSM, ESM). In 2014 he moved to the Directorate General Financial Stability, Financial Services and Capital Markets Union (DG FISMA). He regularly monitors the conditions of financial markets in general and of banks in particular. He has performed a number of analyses in areas such as public support to the financial sector, crisis management framework or monetary policy, among others. Before joining the Commission, Javier worked for two years in a Spanish consultant and two more years for the Galician Institute of Statistics. He studied Economics and Business Administration in Santiago de Compostela and specialised in European Economics in Bruges.
