Larry Donnithorne : West Point Way of Leadership before purchasing it in order to gauge whether or not it would be worth my time, and all praised West Point Way of Leadership:

0 of 0 people found the following review helpful. Good read
By Timothy D. Etson
This book is great! I have not finished it yet because I am taking my time taking copious notes and absorbing everything the author is discussing. The book came in good condition. I liken this book to a text book, although the author may have had another thought pattern. In the final analysis, the attributes of leadership pointed out in this book, are some of the behavioral traits successful organizations look for.
0 of 0 people found the following review helpful. Donnithorne does a great job of explaining leadership through military discipline
By Robert Blum[...] I own a karate school that specializes in

leadership and character development. I thought that Col. Donnithorne did a fantastic job relaying how the skills taught to West Point cadets. He explains in detail how a leader of great character leads with ambition, confidence, courage, intelligence, eloquence, responsibility, creativity, compassion and absolute trustworthiness. I highly recommend this book to anyone in a leadership position or looking to attain one! 0 of 0 people found the following review helpful. Dull and self-serving
By Alan Gorman
I did not like this book at all, and if I am completely honest, did not read it to completion. I came away with the feeling that the author was massaging his own ego, and that the book was extremely militaristic, and its lessons had little application to the regular world.

West Point has bred more CEOs than any business school, and the leadership skills taught there are truly matters of life and death. Bolder than Sun Tzu, savvier than Gracian -- THE book on learning to lead.
From the Hardcover edition.

From Publishers Weekly
Before he retired from the West Point Academy, colonel Donnithorne taught moral philosophy and the leadership training program discussed in this book. After establishing the problems of leadership based on hierarchy and authoritarianism, he describes the model successfully adopted by West Point--a model focusing on character, personal honor and teamwork, stressing an individual's complete absorption in group and institutional goals. Donnithorne overreaches himself, however, in asserting the applicability of West Point methods to the business world. Patterns suitable for 18- to 22-year-olds who have selected a military environment, and who are serving, in effect, an apprenticeship, cannot be transferred readily to corporate structures staffed by experienced men and women. The stakes of military leadership, moreover, differ in essence from those of the corporate world: lives are involved, not balance sheets. Copyright 1993 Reed Business Information, Inc.
From Library Journal
A former teacher at West Point and now the president of College of the Albemarle, North Carolina, Donnithorne presents an interesting and readable account of the way the academy teaches leadership. He describes the leadership skills West Point cadets learn year by year and the process used to instill them. Clearly, the academy does an excellent job; the question is, What can others learn from the way it teaches leadership? The answer is not clear here. Not surprisingly, West Point uses a hierarchical model of leadership. Although some aspects of its leadership training process, especially those dealing with character and concern for others, are transferable, much is not. Recommended for military and comprehensive management collections.- Michael D. Kathman, St. John's Univ. Lib., Collegeville, Minn.
