Tate. This book is full of interesting real life stories, quotes and honest advice that will help you discover your dreams, but to be more precise this book will make you start dreaming again. Like Bob all of us get trapped in absurd goals and false dreams, and this path can lead us to misery. I have experience this just as Bob did and this is the main reason I connected with the message in this book. I really appreciate its message because it came to me in a moment I had reached an illusory summit in my career and was now stuck in the tip of the mountain with nowhere to go. Just because once I got there I had stopped dreaming. Focusing on professional achievements on a career that didn't make me happy had led me to frustration and anxiety. And it is hard to step down the summit and risk all you had achieved to climb there. This book made me feel that I was not the only one out there leaving a career that did not make me happy behind and start a new adventure. I am glad I found this book in this moment in my life, it has been a great guide that reassures my new career path.

By Japanmeister I just finished reading this book and must say that I really enjoyed it. The author's writing style is easy to follow and I appreciated the simple, yet illustrative real life examples he sprinkled throughout the book. Nothing he wrote about was particularly revolutionary or novel. However, his observations and advice were heartfelt and delightfully refreshing to ponder. I'm really glad I read his book. This is more than a simple business book and I am hopeful that I can improve my life by implementing some of the lessons I learned in the book.

By francis maher In my role as president of Rohm and Haas Japan I often contracted Bob Tobin as a consultant for team building and marketing projects. I always found his advise to be creative straightforward and effective. "What do You Want to Create Today" is the next best thing to having Bob consult for you directly. The information is laid out in a logical format and in clear language. The book is clearly an effective distillation of years of lessons learned from a broad spectrum of countries, industries and situations and I highly recommend it.

Forget what you think you know about success and make your own happiness.

Dr. Bob Tobin lived what looked like a great life in Southern California: he had a house by the beach, a good consulting practice, and a BMW. But he wasn't truly happy. Work didn't really work for him. After losing a job, going on a life-changing trip, and gaining a major change in perspective, Bob relocated to Japan, where his career path changed in ways he had never predicted and he finally found personal satisfaction, success, and happiness. But how did he do it? And how can you do it?

Many of us are dissatisfied with our lives but don't make happiness a priority. It's time to forget everything you think you know about success, and stop trying to fit the mold. Traditional models of "success" don't work—not in a way that is right for you. Start learning more about yourself and your passions—and start realizing your creative and professional dreams—today.
