A. O'Carroll : Working Time, Knowledge Work and Post-Industrial Society: Unpredictable Work before purchasing it in order to gage whether or not it would be worth my time, and all praised Working Time, Knowledge Work and Post-Industrial Society: Unpredictable Work:

We are living in the age of imagination and communication. This book, about the new ways time is experienced and organised in post-industrial workplaces, argues that the key feature of working time within knowledge, and other workplaces, is unpredictability, creating a culture that seeks to insert acceptance of unpredictability as a new 'standard'.

"This is a remarkably nuanced and lively account of how time is experienced and negotiated today, particularly in a working world increasingly caught between autonomy and unpredictability. If you are interested in time, work, technology, post-industrial economies or just great sociology - read this book." - Sean O'Riain, National University of Ireland Maynooth, Republic of Ireland

About the Author: Aileen O'Carroll is Manager of the Irish Qualitative Data Archive which is based at National University of Ireland Maynooth (NUIM), Ireland. At NUIM she is also attached to the Life History and Social Change project. Previously she conducted research on the experience of women IT workers at the Employment Research Center in Trinity College Dublin, and on the oral history of dock workers in Dublin while based in the Social Science Research Centre in University College Dublin.
