Privett For those that deliver or study workshops, this is a must-have book. Drawing from the learning style theory of David Kolb, this guide book will help you to design and deliver workshops that cater to the four different learning styles. The book is packed with activities to help you plan your lessons and hone your teaching style. Don't enter the classroom without it.

Clarifying the fine art of workshop design and facilitation, this book - aimed particularly at social workers - is the ultimate guide to setting up and running a workshop. The authors' model takes account of experiential learning and individual learning styles. Numerous examples and exercises are provided.
