0 of 0 people found the following review helpful. it's a good one By pdwoods The author provides very practical and thought provoking information. The exercises make you think through your own experiences and motivation for doing something. 1 of 5 people found the following review helpful. Pop psychology run amok! By A Customer My dictionary

defines amok as: In or into a jumbled or confused state. This describes this tape series, or at least what I could stand to listen to. It used manufactured jargon that is hard to listen to or understand. I never did understand the point of what he was trying to say. Plus the book is read in an awkward way by the author. It sounds too much like reading, not as if he were speaking to me. I returned these tapes but be aware that may not let you return opened tapes. If you are interested in this information I would recommend you buy the book. That way you'll be able to return it if you don't like it. 0 of 3 people found the following review helpful. Not recommended By A Customer Too much jargon and not enough information related to consulting. As a self-help book there are much better books on the market. The reading of the book for the tape is stilted and awkward. If you want to check out this book I recommend the book over the tape set. That way you can pick and choose what you want to review and return it if you don't like it.

This provocative book invites us to look at our lives as individual and unique paths we make in the world and leave behind after we are gone. It is written for people who want to live their lives "thoughtfully", who want to be proud of how they live their lives, and who want to grow in the process.
